### *Long March 8 Launch*

**Space agency/country:** China Aerospace Science and Technology Corporation

**Mission:** *Queqiao-2*

On 20 March 2024, the *Queqiao-2* probe was launched from the Wenchang Space Launch Site, People's Republic of China, on a Long March-8 Y3 carrier rocket. The mission's main scientific objective is to serve as a platform that will collect information and provide communication services for China's future lunar exploration missions in the highly successful *Chang'e* series.
