ALOS-4 H3-22 Launch

Space agency/country: Mitsubishi Heavy Industries

Mission: *Advanced Land Observing Satellite-4 (ALOS-4)*

On 01 July 2024, Mitsubishi Heavy Industries launched its *H3-22* rocket from the Tanegashima Space Center, Japan. The *Advanced Land Observing Satellite-4* is designed to observe the Earth's surface and take high-resolution radar images during both day and night. Moreover, since radio waves can penetrate cloud cover, the *ALOS-4* images can be obtained regardless of weather conditions.
