Copernicus Sentinel-2C Launch

Space agency/country: Arianespace

Mission: *Copernicus*

On 05 September 2024, Arianespace's *Sentinel-2C* rocket was launched from the Guiana Space Centre, French Guiana, carrying Earth observation satellites. The *Copernicus Sentinel-2* mission aims to launch two identical satellites into low-Earth orbit to perform terrestrial observations and cover natural disaster management in addition to forest monitoring and change detection. Arianespace was founded in 1980. It is the first commercial space transportation company.
