Fram2 Launch

Space agency/country: SpaceX
Mission: *Fram2*

On 01 April 2025, SpaceX successfully launched its *Fram2* mission from Cape Canaveral (Florida, USA). *Fram2* was named in honour of the ship that first helped explorers reach the Earth's Arctic and Antarctic regions. It will be the first human space mission to explore Earth from a polar orbit. The mission's science team will also study the unusual polar light phenomenon known as 'Steve', the Strong Thermal Emission Velocity Enhancement.
